

National Severe Weather Warning Service

Chief Forecasters Assessment

A weak front coming up from the south will give light precipitation. As this happens temperatures will rise, though given the recent spell of cold weather this may be a slow process and there is the risk of ice on roads and pavements for a few hours in the morning.

The Met Office have issued a **Yellow Warning of Ice**

Valid from **05:00 on Fri, 14th Dec 2012** until **10:00 on Fri, 14th Dec 2012**

Road surface temperatures may be below freezing as patchy rain, sleet and snow move north across the area on Friday morning. The public are advised to be aware of the risk of ice, especially on untreated surfaces.
